## Professional goal

My goal is to increasingly deepen my knowledge in technology and programming, to lead projects that not only solve real problems, but also inspire and innovate.

## Training

- **Analysis and systems development** - Faculdade das Américas (FAM)  
conclusion: 12/2024
- **Development Web Full-Stack** - Trybe, 1,500 hours of classes focusing on: Introduction to software development, front-end, back-end, computer science, software engineering, agile methodologies and behavioral skills.
- conclusion: 02/2024.

## Professional Experiences

- **Back-end Developer** - Company - NGO Word of Peace (01/2024 - Present) As a Volunteer Back-End Developer, integrating cutting-edge technologies and agile practices into our team. We develop and maintain systems using Node.js, Express, TSOA, TypeScript, MySQL, Sequelize, and Swagger. Additionally, we constantly optimize team activities administration through Figma and Trello, promoting efficient project management. I am continually enhancing my version control skills with Git and code management on GitHub, closely collaborating with colleagues in cross-functional teams, including Back-End, UI, UX, QA, and Front-End. Together, we follow agile methodologies to ensure regular and high-quality deliveries.
- **Full-Stack Developer** - Company: Freelance (03/2023 - present) I work on Full-Stack website and web application development, responding to demands as needed. I use a variety of modern technologies, including React, TypeScript, Docker, Node.js, CSS, Tailwind CSS, SQL, among others. My approach is centered on delivering high-quality solutions that meet the client's needs. I collaborate agilely and efficiently with cross-functional teams to ensure excellence in all aspects of development. With advanced skills in both Front-End and Back-End, I create impactful and functional user experiences. I am always seeking ways to improve and optimize our development processes to drive even more impressive results.
- **Instructor Front-End.(Summer instrução)** - company: Trybe (09/2023 - Current)  
- As a Front-End Instructor at Trybe, I am responsible for conducting individual and group technical monitoring sessions, synchronous content reviews and providing support via Slack to resolve queries. Topics covered include Fundamentals of Web Development, covering HTML, CSS, JavaScript and automated testing with Jest, Front-end focusing on Typescript, React and

Redux, Back-end that encompasses technologies such as MongoDB, Docker, SQL and Node.js, and Computer Science.

## Key Technologies

- Javascript
- TypeScript
- CSS
- API Rest
- Docker
- Express
- React
- Node
- SQL
- Tailwind
- Git/GitHub

## Languages

- **Inglês** - intermediário
- **Português** - nativo

## Recent Projects

- **Sistema de Agendamentos** - The Appointment Scheduling System project is a Full-Stack application developed for a client who owns a barbershop. It allows customers to book appointments for haircuts, beard trims, and other services offered by the barbershop conveniently, in addition to other functions.
